

# A Sick Man Finds It Hard To Succeed At Anything

No man can do his best when he's not AT HIS BEST. Business, Mathematical, Social or other problems are on "speaking terms" only with the man who is constantly ailing.

Any man who is run down—the cause of which can be traced to Kidney, Liver or Stomach troubles or to Acquired or Hereditary Blood Poison can regain his lost health through the use of—

No Time to Get Divorced.

The Lawyer—"You really want a divorce?" The Wife—"Yes." The Lawyer—"All right. What about the alimony?" The Wife—"He can't pay any alimony." The Lawyer—"Eh! What is this—a practical joke? Take my advice, madam, and go back home and wait until he gets something. Fifty dollars, please."

Because It Had No Hard Usage.

A couple were discussing a certain cheap store, he in defense and she the negative. "Say, look at this pocket-book. I bought it for a dime almost a year ago. Not worn a bit," he said. "Well, that's because you don't take it out of your pocket often," she said, and the argument was closed.—Kansas City Star.

Fine Arrangement.

"The daily ration of a Japanese soldier consists of three little bags of rice and one of dried fruit." Fine arrangement. The rice keeps him alive and the prunes keep him angry enough to lick his weight in wildcats.—Louisville Courier-Journal.

## Furnace comfort and efficiency at less than heating stove cost

EVERYBODY who has a house to heat should be vitally interested in this remarkable new hot-air heating system that costs very little more than any ordinary heating stove to buy, no more to install, and much less to operate.

## Estate Hot Storm

—the Stove with a  
"Little Furnace in it"

is not a stove, not a furnace, but a heating system that combines the best features of both. It sets in the room like a stove, its exterior looks like a stove, but there the similarity ends. For the interior is utterly different from any stove you have ever seen; inside it is built like a hot air furnace.

### The diagram shows how it works

Fresh air (just as with a furnace) is drawn in at the sides, heated evenly to several hundred degrees temperature, and then discharged—not through the fire and chimney, but through the top of the Hot-Air Chamber into the room. This creates a thorough circulation of hot air that will successfully heat several rooms. Even the upstairs rooms can be heated by the aid of a simple pipe connection.

### Saved fuel pays for it

Only a very small percentage of the heat is allowed to escape up the chimney, for the Little Furnace blocks the upward rushing heat, absorbing it and throwing it back against the radiating surfaces of the stove proper. This results in an amazing saving of fuel—a saving so great that your Estate Hot Storm will soon pay for itself. And after that it will pay you.

All we ask you to do is to investigate the Estate Hot Storm—give us an opportunity to explain it to you—before you buy a stove of any kind. You owe it to yourself to do this.
